

# Toilet Leak Test

## Do you have a leaking toilet at home?

A leaking toilet wastes a lot of water. It could be wasting as much as 300–1000 litres of water every day!

Ask your parents if you can test your toilet for leaks.

You will need:

- food colouring
- stopwatch or clock
- parent help.

- 1 Remove the tank lid.
- 2 Put a few drops of food colouring in the toilet tank. Do not flush the toilet.
- 3 Wait about 20 minutes.

- 4 Check the water in the toilet bowl. If the water is coloured, then your toilet has a leak!
